March 6th Program	
Schedule	3 - 7
Contributors, Sponsors	
Exhibitors	8 - 9
March 7th Program	
Schedule	10 - 14
McIntosh Center Floor	
Plan & Upcoming events	15

One never saw so many pickup trucks on a college campus. When the pickups arrive at ONU it can mean only one thing: it's Conservation Tillage time for two days when the students are gone on spring break.

The Conservation Tillage conference drew about 800 farmers to ONU for two days of talks by experts. Today's farming is technology, technology, technology to be competitive and efficient with worldwide competition. Farmers know that, so that's why they attend the conference annually to learn the latest.

Talking about tillage.

Many companies had representatives and displays on hand at the Conservation Tillage Conference held in McIntosh Center. The reps explain their products to farmers so growers from Ohio can make use of the newest advances in science and equipment.

Kaylee Port of OSU Apps discusses “Apps to Support Nutrient Management for Crop Production” to a full house of farmers at the Wishing Well in McIntosh Center.

Albert Suniga of Ada helps at the registration table. He is storm water inspector for Allen County Soil and Water.
