Location-

Mercy Health - St.
Rita's

718 Building, 1st floor,
Auxiliary Conference
room #3.

***Parking available in
SRMC parking garage***

Dr. Jason Bowersock and Dr. Jayde Kurland will be presenting a **free** informational seminar for anyone with symptoms of heartburn.

Dr. Jason Bowersock

Dr. Jayde Kurland

Dr. Kurland will discuss heartburn, current treatment modalities, the increasing prevalence of esophageal cancer and why you should care if you're experiencing heartburn symptoms while on medication.

Dr. Bowersock will discuss the LINX Reflux Management System and Nissen Fundoplication as surgical treatment options. LINX is a minimally invasive surgical solution designed to eliminate dependence on medication and improve overall quality of life. LINX prevents stomach acid from moving up into the esophagus. Nissen Fundoplication supports the weak lower esophageal sphincter to keep acid in the stomach.
