Hardin County**

Exotic, Invasive Landscape Plants –

What are they? Why are they a problem? Rapid growth, high productivity rates, lack of natural controls have helped non-natives displace native species. Why are some of your favorite landscape plants a problem in natural areas?

What is Compost? It is the soil amendment of choice to improve soils with organic matter. Learn about the composting process, what nutrients are present in compost, and how you can build your own compost pile to maximize your harvest.

Planting Large Containers - Gardening in smaller spaces and with less time. Instant results to achieve plant color around your home and garden. Easily change containers for each season. What containers to use, what plants to choose, how to put together complementary color schemes, and what to use for filler and interest.

Successfully Growing Hydrangeas – Learn about all the different types of hydrangeas, including new varieties. How and when to prune, how to turn flowers blue, the planting, care, pests/diseases, folklore, and breeding of hydrangeas.

Speakers

Nora Hiland earned a B.S. in Ornamental Horticulture from California State University in Fresno. She worked as a research assistant in horticulture then earned a teaching degree and taught biology and general science in grades 7-12. She has been a Master Gardener in Delaware County since 2009 and a member of Ohio Invasive Plants Council since 2005.

Tim McDermott, DVM, is an OSU Assistant Professor and has been an Extension Educator in Agriculture and Natural Resources for the past seven years. He lectures locally as well as internationally on Local Food Systems and Veterinary Sciences where he spent 20 years in private practice.

Candi Scheiderer has always loved making someone's day. From her career as a critical care nurse to her life as co-owner of Scheiderer Farms, Candi finds that nurturing, whether it's people or plants, is the common thread to having a joyful life.

Bradley Allen found a home in the world of plants in the last 5 years. He earned a degree in Landscape & Turf Management from Owens Community College. He got a job at North Branch Nursery as a laborer before being asked to be an assistant grower with a short-term goal of becoming head grower. Life took on a whole new meaning while battling cancer in 2022. Plants remain his major focus.

- Location: Mid Ohio Energy Cooperative Community Room, 1210 W Lima Street, Kenton, Ohio 43326
- Cost: \$50.00 (\$40 for Active Master Gardener Volunteers) includes continental breakfast, lunch, handouts, and door prizes
